-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S. C. 119(a)-(d), which papers have been placed of record in the file.

Election/Restriction

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-23, 26-37, 39, drawn to a method/apparatus of controlling power wherein the first station transmits signals to a second station, by determining from the received power control command a parameter representative of the quality with which the power control is received at the first station, classified in class 455, subclass 13.4, 522
 - II. Claims 24-25, 38, drawn to method of a method/apparatus of controlling power wherein the first station transmits signals to a second station, by determining the received power control commands; and combining the received values of the received power control commands, and controlling the power with which first station transmits to the second station based on the combined value classified in class 370, subclass 318.

The inventions are distinct, each from the other because of the following reasons:

Inventions in this relationship are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because group I is to a method/apparatus of controlling power wherein the first station transmits signals to a second station, by determining from the received power control command a parameter representative of the quality with which the power control is received at the first station, classified in class 455, subclass 13.4, 522, and group II is method of a method/apparatus of controlling power wherein the first station transmits signals to a second station, by determining the received power control commands; and combining the received values of the received power control commands, and controlling the power with which first station transmits to the second station based on the combined value. The subcombination has separate utility such as measurement of combined received power and combining the received values of the received power control commands, and controlling the power with which first station transmits to the second station based on the combined value

Art Unit: 2686

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Because these inventions are distinct for the reasons given above and the search required for Group I is different than Group II, restriction for examination purposes as indicated is proper.

Conclusion

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Naghmeh Mehrpour whose telephone number is 703-308-7159.
